DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In each of the independent claims, the relationship between the "plurality of dies" and the "workpiece" is not clear. Each of these claims states that the dies are "on" an active side of the workpiece. But the specification at page 5 (last paragraph at the bottom of the page) states that a workpiece is any substrate "upon which *and/or in which*" devices are fabricated. So when the claims say that the dies are "on" the workpiece, could they also be "in" the workpiece? For example, could the workpiece of the claims be a wafer, having dies formed within the wafer itself (so that the dies and the workpiece are not distinct)? The claims require dies "on" the workpiece, which, taken literally, would mean that there would be dies mounted "on" a separate substrate, perhaps a printed circuit board, for example. But the spec seems to leave open the possibility that the dies could be "in" the workpiece, in the manner of dies that are formed within a wafer. So the scope of the claim language is not clear, because "on" (as in the claim language) and "in which" (as in the spec) don't mean the same thing.

The references cited on PTO form 892 teach backside coatings for wafer scale circuitry.
